

Help Your Business Clients Pay, Get Paid, Stay Organized, and Grow

One Platform – All Under Your Brand

Managing profitability and cash flow can be a challenge without the right tools. Bills, expenses, and payments can create data fragmentation that can put pressure on profits and obscure financial visibility.

Profit™ by Paymentus gives banks the power to deliver a modernized payment experience to help your small business (SMB) clients improve profits with better visibility and control over account payables, receivables, and expenses. With Profit, your institution helps SMBs easily pay their bills, reduce the risk of fraud, control spending before it happens, and get paid faster—all in one complete, easy-to-use system.

Profit integrates within your existing accounting software to keep your books up-to-date. Break free from manual workflows, outdated processes, and finance bottlenecks. Give your SMB clients the tools to streamline operations and make data-driven decisions for lasting growth.

Contact us to see how Profit can help your organization:

Deliver the Fintech Edge

Provide seamless, modern payment experiences that stop "silent churn" and remove SMBs from fragmented financial realities while keeping deposits, revenue, and transaction data within your ecosystem.

Deepen Customer Loyalty

Strengthen your brand by bringing modern financial workflows directly to your clients, ensuring your FI remains their indispensable operating platform.

Close Cash Flow Gaps

Improve SMB liquidity and streamline financial workflows with integrated tools designed to accelerate collection and simplify daily operations.

Profit by Paymentus enables banks to offer SMBs a complete financial management tool integrated within your platform to help businesses control financial workflows, automate payables and receivables, and reduce friction—all under your brand. It delivers real-time visibility and seamless integration with Quickbooks, Sage Intacct, and Oracle NetSuite, giving businesses the tools to control spend, boost cash flow, and reduce administrative burden.

Key Benefits

Help clients accelerate cash flow with digital invoices.

Create and send invoices quickly, and offer a variety of payment options including credit/debit card, ACH, digital wallets ((Apple Pay®, Google Pay™, PayPal, Venmo), and more.

Automate bill pay & approvals.

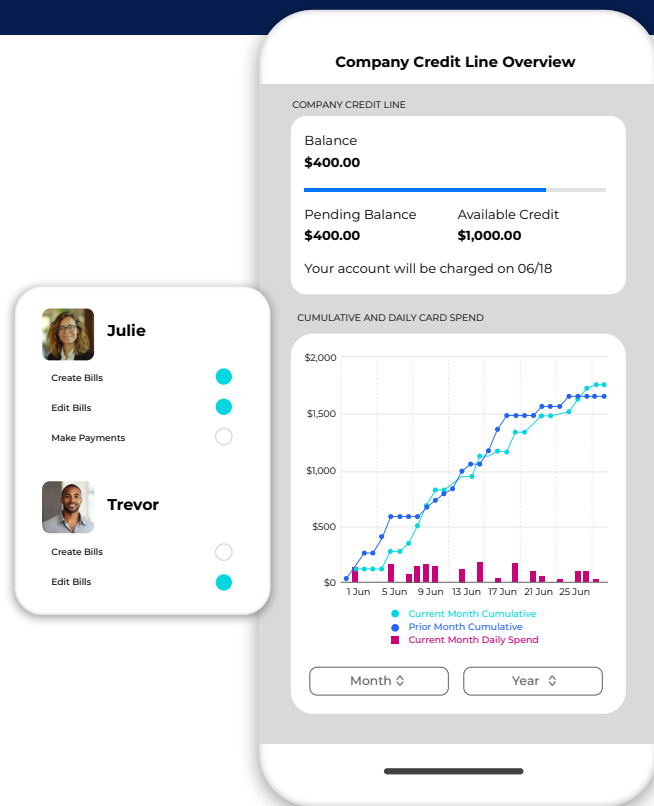

Eliminate manual data entry. Auto-capture bills with OCR, route approvals by role, set reminders, and reduce follow-ups. Pay by check or send a pay-ready file to your accounting software or bank account.

Embedded banking within SMB workflows.

Embed your FI into the client's daily business operations with bi-directional ERP integrations. Recapture payment flows and unlock transaction fee revenue to become the indispensable operating platform for your SMB clients.

Paymentus Banking & Fintech also offers a full product suite including Bill Pay, Loan Payments, P2P, A2A and more.

Do more than hold their deposits—power their business by giving your SMB clients the tools they need. For more information or to request a demo, visit www.paymentus.com/banking-fintech or contact sales@paymentus.com.

Paymentus
