Signals future of P2P Payments

OVERVIEW

The Paymentus Person-to-Person (P2P) solution via our PayItNow™ service is a financial institution-centric money movement offering that enables bank customers or credit union members to electronically “Send Cash” from their banking account to anyone’s account at another financial institution – simply, securely and in a timely manner.

Paymentus P2P puts FIs back in the center of the payments process by offering a convenient way in which to send and receive cash directly from a person’s banking account via the web, mobile or tablet device.

By using this FI-co-branded P2P payment service, a bank’s customer or credit union’s member can easily and electronically send money to a recipient at any time. The process uses the Paymentus PaySafe™ Good Funds model that is risk free and delivers the money by the next day

SIMPLE TO USE

With Paymentus the P2P process is simple. A bank’s customer or credit union’s member simply provides the email or phone number of who they want to send money to and the amount. The recipient is then notified by email or text message with instructions on how to securely accept the funds. Once completed, the funds are electronically transferred and the transaction is complete. It’s simple, safe and fast!

Payments in the Digital World.

Paymentus is a next-generation provider of digital payment solutions, which features a single consolidated platform for electronic bill pay, account-to-account (A2A) and person-to-person (P2P) offerings, each designed to keep banks and credit unions at the center of commerce.

Along with our innovative technology, cloud delivery model and single platform approach to digital payments, our people set us apart from our competition. We bring extensive financial services industry experience to everything we develop, and we thoroughly understand your business. We focus on market trends and demands while continually enhancing our solutions to provide a competitive edge.

Paymentus can help your bank or credit union address the threats and capitalize on the opportunities involving the payments space, and provide your bank or credit union with the emerging payment technologies to better serve the needs of your customers or members.

We look forward to demonstrating how partnering with Paymentus can help you to better compete in the marketplace.
